Product Description

The gorgeous lamppost for gentle illumination finishes in such a way to suit your decor. The yellow teakwood stone outdoor garden lamp post illuminates the exact brightness and color temperature you prefer. Material: Teakwood stone statue **Dimension(HWL):** 42 x 10 x 10 inch **Height:** 3.5 ft **A disquisition of the decorative stone:**

- The structure above is an outdoor lamppost.
- A wide base on the bottom, where a plinth is placed atop which a light fixture house is made.
- The light fixture house is the place where you can insert your light bulb, with several sectional narrow holes made to spread the lighting.

Light post ideas :

- The front garden should be illuminated when night falls, especially around the front door.
- Using it near any pool or pond where the soft light reflects off water, always looks magical.

- Highlight built-in benches and other features of your patio for a warming, cozy glow with this light post.
- Add to the Alfresco for an enchanting vibe and boost the feeling of romance – perfect for intimate evening gatherings.
- Incorporating it into the driveway not only adds exterior illumination but also landscape lighting nearby.
- Putting them into driveway edges helps you to park and at the same time illuminates nearby hedges too.

Care & maintenance of the decorative stone:

- Any item that is kept or being used outside, requires regular care and maintenance. Keeping it cleaned once a month will remain reliable for years to come.
 - To clean the statue first turn off the switchboard then, unassembled the detachable parts of the lamp post.
 - Next step to follow by detaching the light bulb using a glove or rag for safety.
 - Now using a damp cloth wipe down all the detachable parts one by one.
 - Use a vacuum or a cotton broom to dust the lighting fixture house where the chances of spider waves and debris are gathered.
 - Once you are done with all the cleaning, now reassemble all the parts and fix the bulb in its previous position, and enjoy the illumination.
-
